5. INCIDENT NARRATIVE

At approximately 06:52 AM on May 20, 2026, the insured (Luis Alberto Pereyra Cabral) was travelling northbound on the Autopista Duarte at approximately 65 km/h in foggy conditions with reduced visibility. Traffic slowed suddenly due to a vehicle that had stopped in the right lane approximately 400m ahead. The insured reacted but was unable to stop in time, rear-ending the Toyota HiAce van (plate G-556677) owned by Empresa Transporte Veloz, SRL. The collision caused a chain reaction: the HiAce was pushed forward into the Honda HR-V (plate F-334455), and the motorbike (MTB-889901) that had been overtaking in the left lane was clipped by the insured's vehicle spinning laterally. AMET officers arrived within 8 minutes and produced a traffic reconstruction report. The insured's vehicle sustained front-end damage and is also subject to a separate DP claim.

6. CONSOLIDATED DAMAGE SUMMARY

TP Vehicle 1 (Honda HR-V):	DOP 185,000 — moderate front and rear damage
TP Vehicle 2 (HiAce Van):	DOP 380,000 — severe structural damage, chassis deformation
TP Vehicle 3 (Motorbike):	DOP 145,000 — total loss declared by independent assessor
TOTAL THIRD-PARTY CLAIM:	DOP 710,000
